

“TRAFFORD” ELECTRICAL ACCESSORIES

THE BRITISH
WESTINGHOUSE
ELECTRIC AND
MFG. CO., LTD.

MANCHESTER

Supply List No. 111

(Partially superseding List No. 201)

October, 1911

Conditions of Sale

Prices.—This list supersedes all previous lists and quotations, and is subject to alteration without notice.

Payment.—All accounts are strictly monthly, and if paid within one month following delivery 2½% discount is allowed, otherwise the account is NETT. Cheques should be crossed "& Co."

First Orders should be accompanied by a remittance in full, and also usual trade references if a ledger account be desired.

Foreign Orders must in all cases be accompanied by a remittance, or arrangements made for payment on presentation of shipping documents.

Ordering.—When ordering, it is important that full particulars and catalogue numbers be given.

Packing Cases are charged at cost if not returned to us duly advised and carriage paid, undamaged and in good condition, within one month after delivery.

Delivery.—Free on Rail, Manchester. Parcels of £2 value and upwards carriage paid.

Damage or loss in transit.—We will not be responsible for damage or loss in transit. The Purchaser should sign carrier's receipt note, "Goods received unexamined." If goods are found to have been damaged we are to be notified at once, and a claim against carrier must be made by the Purchaser within three days of receiving them, otherwise no compensation can be made.

Claims for Shortages or other differences can only be entertained if notification is received by us within seven days from date of Advice Note. Any goods returned and not previously advised will be refused.

Goods supplied.—The illustrations are typical, and represent as nearly as possible what we supply, but, due to the fact that modifications and improvements are made from time to time, we do not guarantee that the goods supplied are in all cases identical with the illustrations.

Introduction

ELECTRICAL ACCESSORIES are in brisk daily demand, and constitute the necessary stock-in-trade of every dealer in electrical goods. One of the great difficulties of the dealer, however, must ever be to decide from the very numerous different makes of fittings which is the best, both as regards quality and price. Providing he succeeds in securing a good and reliable make of accessory at the right price, he is assured of a brisk and steady trade. But, as with so many makes, the general finish and design is sacrificed to bring the price down, the purchaser can only judge by experience which kind of accessory it will pay him best to sell.

Westinghouse electrical accessories are recognised for their general excellence, and, as to the question of prices, a casual glance through this list will show that these are *right*.

We can supply electric light installation material of every description—lamps, fittings, fans, cooking and heating appliances, conduit, wires and cables, also bells and telephones.

Copies of our lists, descriptive of any of above apparatus, will be forwarded on application, and prices for any goods not included in these lists can be furnished on application.

FLAT TYPESingle Pole
TUMBLER SWITCHES

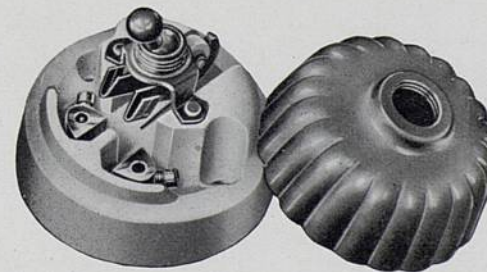

Cat. No. 02334.

ARE VERY COMPACT in design and of exceptionally neat appearance. They have a smooth reliable action, and all parts are well assembled. The switches, which can be supplied with either black or cream best English china bases, are made in one size, of 5 amperes capacity and fitted with polished brass covers. They are suitable for use on circuits up to 260 volts.

Cat. No.	5 Amp.	Per Doz.
02334	White base	14/-
02332	Black base	14/-

DOME TYPE.—Single Pole.

SPECIALLY designed to provide a sound and reliable switch at a moderate price. The parts throughout are substantial and of the best materials obtainable. The bases (black or white) are of porcelain, made from the finest English clay, thoroughly glazed and fired to enable the bases to resist earths and leakage. The current carrying parts are effectively insulated from the cover and handle. The action of the switch is easy and positive. Good contact is made and the poles are separated by a porcelain wall. Suitable for use on circuits up to 260 volts.

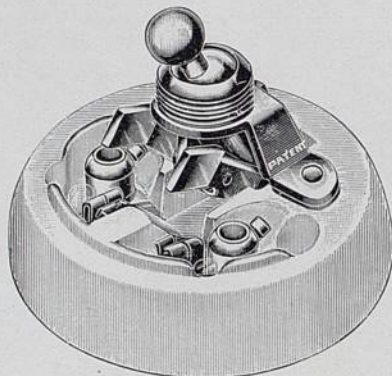

Cat. No. 0652.

TRAMCAR SWITCHES

600 Volt. Single Pole.

Cat. No. 05278

THESE SWITCHES are designed for use on high voltages and are therefore specially adapted for tramcar service. They have a very quick quadruple break. The bases are of white porcelain and are made solid or slotted. The covers are of polished brass, lined with insulating fibre and the handles are of ebonite. The switches can be supplied fitted with discs for indicating when they are "on" or "off," and are made in 5, 10 and 20-ampere sizes. If desired the switches can be fitted with a special lock attachment instead of the ebonite handle.

DOOR SWITCHES

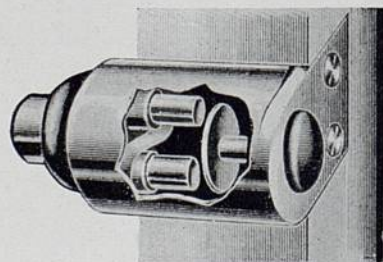

Cat. Nos. 0247-8

Showing switch with cover removed.

NEAT and compact. The switch is actuated by the door pressing against the plunger. Can be arranged so that opening the door either switches on or off as desired. Is provided with a ratchet movement and an insulated cover. For use on circuits up to 260 volts.

Cat. No.	Amps.	Price Each.
0247	1	s. d. 3 0
0248	1½	5 2

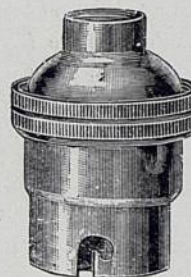

Cat. No. 0472

Lavatory or Bolt Switch.

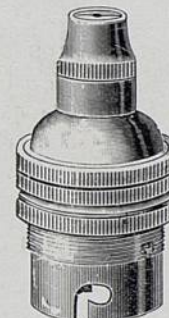

THIS switch is contained in a heavy cast-metal barrel. The current-carrying parts are mounted on china. The switch is actuated by so arranging the bolt of a door that it is in line with the switch. When the door is closed and bolted, the bolt presses against the plunger and switches on the light. When the bolt is withdrawn the light automatically goes out.

Cat. No. 0472 Price 8/6 each.

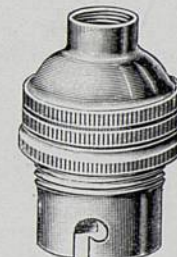

LAMP HOLDERS

Cat. Nos. 0119 and 0126

Cat. Nos. 0118 and 0125

Cat. Nos. 0120 and 0127

THE lampholders listed below are of substantial finish and are thoroughly insulated, rendering them suitable for use on high voltages. They can be supplied in polished brass or aluminium, or with a steel bronze finish. The aluminium holders are especially recommended for installation in positions where, due to the presence of chemical action, brass holders might deteriorate. They are also most suitable for use with nickel or silver-plated fittings.

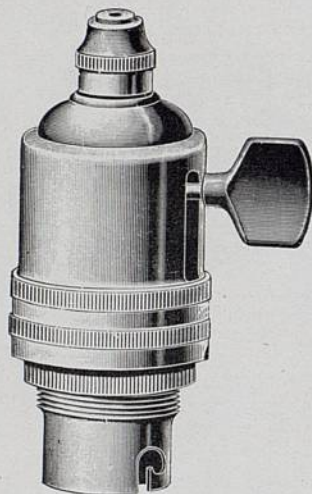

PRICES

For polished-brass, aluminium or steel-bronzed.

"TRAFFORD" GOLIATH LAMP HOLDERS

FOR HIGH CANDLE-POWER
METAL-FILAMENT LAMPS

Cat. No. 03042

IN order to provide a suitable holder for the high candle-power metal-filament lamps which are now becoming more or less extensively used, a special lampholder has been designed which is capable of taking lamps of from 400 to 1000 c.p. It is provided with a $1\frac{1}{2}$ " Edison screw. The contacts are of copper and all current carrying parts are liberally designed.

The holder is $3\frac{5}{16}$ " in length and is tapped to take $\frac{5}{8}$ " male thread.

It has a neat polished brass finish.

Catalogue No.		Price
03042	Edison screw holder	3/6 each.

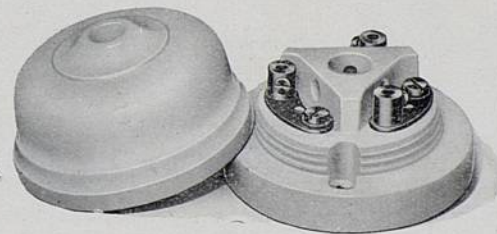

The high candle-power "Auriga" metal-filament lamps are made to fit these holders, for particulars of lamps see List No. 102.

CEILING ROSES

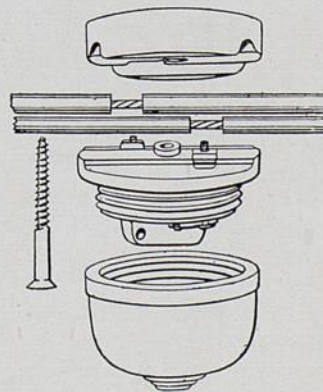

Cat. Nos. 063-4

THESE are of the loop-in type, with the "H" form of insulation between terminals. The best English porcelain is used in their manufacture. The terminals are large and are securely fastened to the base. The porcelain bridges, by means of the holes therein, partially support the flexible wire and pendant, thus taking the dead weight off the terminals. The bases are $2\frac{1}{2}$ " diameter.

Cat. No. 065

Cat. No.	Description	Per doz.

064	" " best... ..	6/6
065	Two- " three plate... ..	6/-

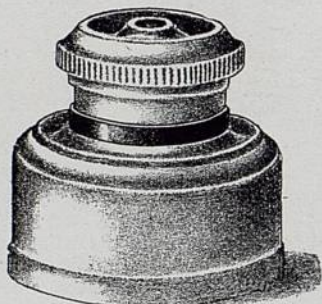

Cat. No. 05055

Cleat Type

This type has several advantages over the ordinary type of ceiling rose. It eliminates the necessity of cutting wires, of jointing, of looping-in, of soldering, and reduces the amount of time required for fixing to about one-sixth. Suitable for any size of cable between $\frac{1}{8}$ " to $\frac{1}{4}$ " S.W.G.

Cat. No.	Price
05055	10/- per doz.

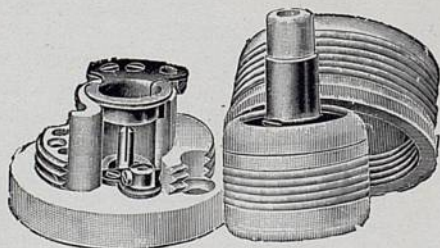

WALL PLUGS AND SOCKETS

Cat. No. 0265

The pins and sockets each are made with different diameters. It is only possible, therefore, to insert the plug one way, thus ensuring the correct polarity.

All types are suitable for use on circuits up to 260 volts.

Cat. No. 0262

THESE are made to limit gauges, thus ensuring perfect contact and easy working of the plugs and sockets. The terminals are substantial and ample for carrying the currents indicated. The china and cocus hard wood used are of the highest quality. The two-pin differential type listed below is specially designed for use on arc and mercury-vapour lamps or power circuits.

STAGE FLOOR SOCKETS AND PLUGS

Cat. No. 0271

THE floor socket is enclosed in a cast-iron box, having a brass top fitted with a snap lid. The plug is of polished wood and is arranged with a double-pole fuse. Taped for $\frac{3}{8}$ " tube. Suitable for use up to 6 amperes 125 volts.

Cat. No. 0271 Price 8/6 each.

Cat. No. 0272

THIS is generally similar to the above type. The differences being that the brass lid is divided and the plug is of porcelain with non-interchangeable poles. Suitable for use on circuits up to 260 volts, and 6 amperes capacity.

Cat. No. 0272 Price 11/- each.

The British Westinghouse Electric and Mfg. Co., Ltd.

HAND LAMPS

"Trafford" Safety Type

Cat. No. 01725

With ordinary Lampholder.

Cat. No. 01726

With Switch Holder.

Cat. No. 01727

Watertight Type.

SPECIALLY designed to meet the stringent regulations of the Home Office, and to eliminate all risk of danger due to exposed metal parts. The lampholder and lamp cap are entirely enclosed in a substantial and highly polished hardwood handle. The flexible leads are brought in through a special screwed fibre nipple and a soft rubber bush, which grip the flexible and effect a thoroughly watertight connection.

Made in two types for interior or exterior use, with or without switch. The outdoor type is rendered completely watertight by the provision of a well-glass and rubber packing glands.

The lamp cages can be sealed to the handle, thus preventing unauthorised persons from tampering with the lamp.

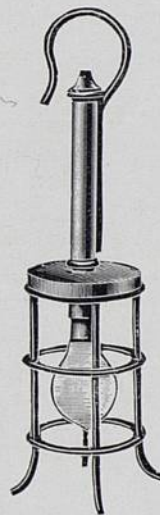

The prices below include lampholders but not lamps.

Cat. No.	Description.	Price Each.	Per Dozen.

"TRAFFORD" ELECTRIC POCKET LAMPS

Cat. No. 0889
(Partly open to show interior)

THIS is a most useful article for every household, it provides an excellent emergency light in the bedroom. It is invaluable for cyclists, motorists, postmen, doctors, the police, gas and other inspectors, watchmen, etc.

It is compact, strong and reliable. It fits the waistcoat pocket and is suitable for continuous or momentary light. Will burn for from four to six hours with one charge.

Can be fitted with yellow or ruby caps for photographic work.

A cycle holder attachment can be supplied which, when complete, furnishes a very convenient cycle lamp.
